.357 Magnum**

Alfa Proj .357 Mag. Stainless Steel Finish

.357 MAGNUM

The .357 Magnum revolvers were designed to meet the requirements of the most demanding users from the ranks of armed forces, private security agencies and citizens who take their security seriously.

The high .357 Magnum cartridge output in combination with our revolver form a reliable weapon system for all emergency situations. The drop-down safety protection and the all-steel frame guarantee a high level of safety when carried in any conditions. The accuracy

and output of the six-inch version is suitable for hunters using short guns. The .38 Special revolvers are intended for demanding sports shooters and customers who prefer the traditional accuracy and low recoil of the .38 Special shot. High-strength steel guarantees a long life of the weapon even at frequent sports shooting. The full weight of the gun and low recoil are appealing features for defensive and service use as well.

.38 SPECIAL

The ALFA .38 Special and .32 S&W revolvers featuring a lightweight alloy frame are intended for comfortable all-day carrying and self-defence.

Due to the meticulous selection of materials and material quality, ALFA revolver also offers a cost-effective option for practice shooting. Thanks to the reliable drop-down safety, even a fully loaded ALFA revolver is always safe yet ready for use.

MODEL 831

.22 LR

High-precision revolvers for maximum delight and pleasure in shooting. The all-steel frame and the precise workmanship guarantee excellent shooting results over long time. The full weight of the gun and low recoil are appealing features for defensive and service use of .32 S&W revolvers.

The gravity centre position and a very low recoil of the .22 WMR and .22 LR are suitable for the training of beginner shooters. The larger cylinder capacity of the .22 LR revolver is also advantageous for action shooting training. An optional replaceable .22 LR cylinder is available for the .22 WMR revolver.
